

Saher Khateeb

Versatile Software Engineer with 3+ years of experience in backend and full-stack development, specializing in C#, .NET Core, and microservices. Proven track record in building scalable systems, developing robust APIs, managing databases, and delivering cloud-native apps. Comfortable across the stack with modern frontend frameworks and committed to writing clean, maintainable code.

EXPERIENCE

Full Stack application — Cambium | 📅 2021 - 2023

- Developed and maintained **WPF C#** Windows applications using **MVVM pattern**
- Built **backend** components with **C# .NET** for Canon camera control and image acquisition
- Designed and extended **RESTful APIs** (PHP-based), integrated with **Angular frontend**
- Deployed and maintained **AWS EC2 instances** and **S3** for web services
- Applied **object-oriented design principles** and ensured high maintainability and performance
- Participated in the full software development lifecycle, from design to deployment

Support engineer — Qwilt | 📅 2023 - present

- Utilized **Python** and **Bash** scripting for automation and diagnostic tools
- Engaged in **Linux-based systems** troubleshooting, performance tuning, and SSH-based tasks
- Created documentation and monitoring solutions aligned with network operations
- Strengthened problem-solving and cross-functional communication with clients and internal teams

EDUCATION

- **B.Sc. Software Engineering**
Sami Shamoon College of Engineering | 2018 – 2021
- **AWS Certified Developer – Associate (DVA-C02)**
AWS Training & Certification | 2023
- **Full Stack Developer Bootcamp**
John Bryce | 400+ hours | 2021 – 2022

Key Projects

Waste Management System – Graduation Project

- **Tech:** Java Spring Boot (Microservices), React, AWS EC2, Embedded C++
- Built a distributed microservices system for real-time waste tracking
- Integrated embedded hardware via serial communication
- Won 1st place in SE Department Hackathon | [Demo](#)

Finds – Car Parts Management

- Angular + Node.js app for managing and selling automotive parts
- Developed to enhance Full-Stack and cloud deployment skills
- First place in the software engineering department, article: <https://bit.ly/3CrJb8u>
- RT Embedded device in C/C++ for seamless integration

AWARDS

🏆 **Hackathon (Feb 2024)**
Energy-Water Nexus Hackathon event. First place [LinkedIn](#)

🏆 **Hackathon (Jun 2023)**
Eco Solutions Event, two-day challenge. Second place [LinkedIn](#)

SKILLS

C#, .NET, Java, Python, TypeScript, PHP

Microservices, REST APIs, OOD/OOP, Multithreading

WPF, Angular, React

Git, Docker, AWS, K8S
MySQL, MongoDB, NoSQL
Agile, DevOps, CI/CD

Highly adaptable to new environments, tools, and evolving project requirements

LANGUAGES

Arabic- Mother tongue

English- Fluent

Hebrew- Fluent
